Enables Exciting EHR Features for Ultimate Patient Care

Focus more on Patient Care - No more error-prone, time consuming manual vital sign charting.

Improve Quality of Medical Procedure - With complete vital sign record of medical procedure, medical management can perform data analytics to improve operational quality & efficiencies.

Faster Responsiveness - Enables EHR notification to doctors to include vital signs for a full scope assessment remotely.

Enables Tele-medicine -
Live vital sign data streaming enables doctors to offer services remotely with ease.

• Comes pre-configured
• Installation takes as little as a minute

Flexible
• No on-premise server required; but also works with your server if needed

Deployed Over 10,000 Units in Over 1000 Hospitals & Surgery Centers

---

*"Our clients appreciate this feature as it **streamlines documentation** and helps **improve patient care** by removing this manual step. We have been successful in deploying **SIS Charts™** with vital sign charting automation in multiple facilities during the past six months."*

*– **COO, Surgical Information System™***

*"Our ASC has used Nexi devices to **interface with SIS and Epic EHRs.** Both interfaces were **seamless.** The ease of use for connecting the devices is streamlined, and when we ever have any issues or questions, customer service is prompt and efficient. Overall, we are **very satisfied with our Nexi product services.**"*

*– **Services Manager, Rebound Orthopedics & Neurosurgery***

*"By partnering with Neximatic, we've been able to **broaden our compatibility with a wider range of makes and models,** while significantly **reducing the IT workload** required from our Surgery Center clients during implementation."*

*– **SVP, Head of Product, HST Pathways™***

EHR we have experience with:

SURGICAL INFORMATION SYSTEMS™

Epic

HST Pathways™

medaxion:

GRAPHIUM HEALTH™

MEDNET®
